01 ABOUT US

A Java vanilla house, *built on trust*

La Vanilla Supplier is the export brand of PT Penta Pelita Semesta, a registered Indonesian company in Central Java. We bring vanilla from the farms of Java to food makers, importers and distributors around the world.

Our work starts long before anything is packed. We work hand in hand with smallholder farmers across Java, follow every lot through curing and grading, and only ship what matches the grade our buyers approved.

Today we supply vanilla beans, vanilla paste and pure vanilla powder, from a single kilo for product development to hundreds of kilos a month for production, and we pack them under our buyers' own brands as private label.

A PERSONAL NOTE

Irfan

Export Director

Every bean we send out carries a long story: the farmer who pollinated its flower by hand, the months of slow curing under the Javanese sun, and our team, who graded it one bean at a time.

The last pair of hands is yours. You turn our vanilla into something people remember, and that is why I see every buyer as a partner, never an order number.

That is what Your Formula. Our Vanilla. means to us. You bring the recipe and the vision; we bring vanilla you can build them on, batch after batch.

When your business grows, our farmers gain steadier work. When they do well, the vanilla gets even better, and that comes back to you. Honest, personal and good for both sides: that is the partnership I want to build with you.

So let's start simply. Tell me what you are creating and I will send you a sample. If it feels right, we grow from there, together.

Irfan

10+ years
Working with Indonesian vanilla

150+ tons
Of beans, paste and powder exported

20+
Countries across Asia, Europe, the Americas and the Middle East

30+
Food makers, importers and distributors

02 OUR PROMISES

Six promises we keep *on every order*

Buying vanilla from abroad should not feel like a gamble. These are the commitments behind every quote we send and every box we pack.

1 **No middlemen**

We work hand in hand with Java's growers, with no traders in between. Fewer hands mean fresher beans and honest prices.

2 **What you approve is what ships**

Start with a free sample. Once you approve it, your order is graded and packed to match it.

3 **Two grades, no guesswork**

Grade A and Grade B, each with stated length, moisture and vanillin ranges, so you know exactly what you are buying.

4 **Paperwork that clears customs**

Phytosanitary certificate, invoice, packing list and air waybill on every shipment, plus a Certificate of Analysis per batch on request.

5 **Your brand, our vanilla**

Private label for beans, paste and powder, packed and labelled for your shelves or your customers.

6 **A reply within 24 hours**

Quotes, samples and questions answered fast, and air freight that reaches 20+ countries in 3 to 7 days.

WHAT WE BELIEVE

Vanilla is grown, not manufactured.

Respect the time it takes.

A vine takes years to flower and every flower is pollinated by hand. We never promise what nature cannot deliver.

Farmers are partners.

When the people who grow our vanilla do well, the vanilla does too.

Honesty is part of the product.

If a grade is not right for you, we will say so.

WHO WE WORK WITH

- Food and beverage manufacturers
- Bakeries and patisseries
- Ice cream and dessert makers
- Importers and distributors
- Private label brands
- Chefs and foodservice
- Specialty retailers

03 THE RANGE

One bean, *three ways to use it*

Everything we sell starts as the same cured Vanilla planifolia bean from Java. Choose the form that suits your recipe and your process.

Vanilla Beans

Grade A for gourmet use, Grade B for extraction.

Hand-picked at peak maturity and slow-cured for six to nine months. Grade A beans are plump, oily and fragrant for pastry, ice cream and retail. Grade B beans give real vanilla character at a better price per kilo for extracts and syrups.

Grades	A & B
Species	V. planifolia
Packing	1 kg or 2.5 kg vacuum
HS code	0905.10

Vanilla Paste

Glossy, full of real bean specks, made to your recipe.

Made from our cured beans with the strength, sweetness and texture adjusted to your formulation. A favourite with bakeries, ice cream makers and dessert producers who want visible specks.

Strength	1, 2 or 3 fold
Formula	Custom
Packing	1 kg jars
Private label	Glass jars

Vanilla Powder

100% vanilla, finely ground, nothing added.

Pure cured beans milled to a consistent mesh, for baking mixes, instant drinks, nutrition powders and any recipe where liquid vanilla will not work.

Purity	100% vanilla
Mesh	40-80
Packing	Vacuum-sealed
HS code	0905.20

04 SPECIFICATIONS

The numbers, *in plain sight*

Grade A · Gourmet

Long, plump and supple. Chosen when the bean itself is on show: pastry, ice cream, fine dining and retail.

Grade B · Extraction

Drier and shorter, with full vanilla character. Chosen for extracts, syrups, paste and powder.

VANILLA BEANS	*Grade A*	*Grade B*
Species	Vanilla planifolia	Vanilla planifolia
Length	15-20 cm	10-15 cm
Moisture	25-35%	Under 25%
Vanillin	1.1-2.5%	1.0-2.0%
Curing	6-9 months	6-9 months
Appearance	Dark brown to black, oily, supple	Drier, may be split or shorter
Packing	Vacuum-sealed, 1 kg or 2.5 kg	Vacuum-sealed, 1 kg or 2.5 kg
HS code	0905.10	0905.10

PASTE AND POWDER	*Vanilla paste*	*Vanilla powder*
Made from	Cured V. planifolia beans (1.1-2.5% vanillin)	100% cured vanilla beans
Strength or grind	Single, double or triple fold	40-80 mesh, adjustable
Composition	Custom sweetness and viscosity	No fillers, no additives
Moisture	Not applicable	Under 5%
Shelf life	24 months unopened	Keep cool and dry
Packing	1 kg plastic jars, or glass jars for private label	Vacuum-sealed packs
HS code	2106.90 (indicative)	0905.20

Typical ranges for our standard lots. The Certificate of Analysis for your batch, available on request, takes precedence. Paste strength is stated as fold; the vanillin range refers to the beans it is made from. Final HS classification of paste depends on formulation and destination.

05

THE LA VANILLA STANDARD

How every batch *is made ready*

Five steps, always in the same order. It is how a bean picked in Java arrives in your kitchen or factory exactly as promised.

1. **Sourcing** *partner farmers in Java*
   Vanilla planifolia grown by smallholder farmers we know and work with season after season.
2. **Curing** *six to nine months*
   Blanched, sweated, sun-dried and slowly conditioned. Nothing is added; time builds the aroma and natural oils.
3. **Grading** *sorted by hand*
   Every bean is checked for length, moisture, colour and defects and placed in Grade A or Grade B.
4. **Batch check** *before packing*
   Each batch is compared with the grade you ordered. A Certificate of Analysis is issued on request just before it ships.
5. **Packing and shipping** *3 to 7 days by air*
   Vacuum-sealed to hold moisture and aroma, then flown out with full export paperwork.

Halal certified

MUI · MAJELIS ULAMA INDONESIA

Suitable for halal markets worldwide.

Phytosanitary certificate

WITH EVERY SHIPMENT

Plant health inspection before export.

Certificate of Analysis

PER BATCH, ON REQUEST

Confirms the specs of the grade you ordered.

06 WORKING WITH US

Simple terms, *flexible when you grow*

Clear starting terms for a first order. For regular or larger volumes, almost everything below can be tailored to you.

MINIMUM ORDER

From 1 kg

Free samples are available. You only cover shipping.

PRICING

A tailored quote within 24 hours

Based on grade, volume and destination. Better rates per kilo from 100 kg, with extra discounts for long-term supply contracts.

PAYMENT

T/T, Wise or PayPal

Standard orders are paid 100% before dispatch. Deposit terms for larger or scheduled orders, and L/C at sight for long-term contracts, agreed per order.

SUPPLY CAPACITY

Hundreds of kilos a month

Shipments can be scheduled around your production calendar.

PACKAGING

Packed the way you need it

Beans	Vacuum-sealed, 1 kg or 2.5 kg
Paste	1 kg jars, or glass jars for private label
Powder	Vacuum-sealed packs

Other sizes and formats on request.

SHIPPING

Air freight in 3 to 7 days

FCA Surakarta, CPT or DDP. Sea freight on request for very large orders.

DOCUMENTS

Ready for customs

Phytosanitary certificate, commercial invoice, packing list and air waybill, with a Certificate of Analysis per batch on request.

PRIVATE LABEL

Your brand, *our vanilla*

Launch your own vanilla line without building a supply chain. We supply beans, paste and powder packed under your brand, ready for your shelves, your customers or your kitchen.

1 **Tell us your product**
Which vanilla, the recipe or grade, and how you want it packed.

2 **Approve a sample**
We prepare it to your specification so you can check it first.

3 **Packed under your brand**
Vacuum packs for beans and powder, glass jars for paste, with your label.

4 **Shipped with full documents**
By air in 3 to 7 days, ready for customs.

Taste it first, *then decide*

Tell us what you make, the grade and volume you need and where it is going. We will reply within 24 hours, and your first sample is free.

1

SMALL SAMPLE

Free sample

Check the colour, aroma and texture against your own standards. You only cover shipping.

2

FROM 1 KG

Trial order

Enough for your team to test and run through your process, at wholesale rates.

3

FLEXIBLE VOLUMES

Regular supply

Scheduled shipments with full export documents and a CoA per batch on request.
