WHO WE ARE

A vanilla partner built for serious B2B buyers

La Vanilla Supplier is operated by PT Penta Pelita Semesta, a registered Indonesian company based in Surakarta, Central Java. We source, grade, condition and export Indonesian vanilla in bean, paste and powder form to food manufacturers, flavour houses, distributors and specialty producers worldwide.

Indonesia is one of the world's largest vanilla-producing countries, yet international buyers have long struggled with the same problems: inconsistent grading between shipments, unverifiable claims about origin, and suppliers who disappear when a container arrives off-specification. We built La Vanilla Supplier to solve exactly that.

We work with farmers and established curing partners across Indonesia's vanilla regions, then apply our own grading, moisture conditioning and packing standards before any lot is released for export. Every shipment is traceable to its source lots, backed by documented specifications, and supported by a team that handles the full export process — from sample dispatch through customs clearance documentation at origin.

We are involved in the product long before it is packed. We work with the same farmers and curing partners season after season, and every lot is inspected against our own standards before it is accepted — moisture, flexibility, aroma, mould and foreign matter. Lots outside specification are rejected rather than blended into a shipment. Nothing reaches a buyer until it has passed that stage, and because the stock is ours by then, rejecting it costs us and not you.

WHO WE SUPPLY

- Food & beverage manufacturers
- Importers, distributors and repackers
- Private label and own-brand programmes
- Flavour houses and extractors
- Bakeries, chocolatiers and ice cream producers
- Specialty retailers and foodservice groups

WHY GLOBAL BUYERS CHOOSE US

Four reasons buyers keep reordering

B2B vanilla buyers need three things above all: consistency they can plan around, transparency they can verify, and supply they can rely on across seasons. Everything we do is organised around those three.

01

Control from cure to container

We work with the same farmer groups and curing partners season after season, and hold each harvest to the same cure and moisture standards. That continuity, and lot-level traceability from field to shipment, is why one delivery matches the last.

02

Inspected before it is offered

Every lot is checked on arrival and anything outside specification is rejected, not blended in. We quote only against beans we have graded ourselves, and we will show them to you on a live video call before any deposit is paid.

03

Complete documentation

Phytosanitary certificate, certificate of origin, commercial invoice, packing list and batch specification accompany every shipment. Lab analysis for vanillin, moisture, pesticide residue and microbiology is available on request per lot.

04

Shipping and terms

FOB from Jakarta, Semarang or Surabaya, plus CIF and DDP. Air freight via DHL, FedEx or air cargo for samples and trial volumes; sea freight for container-scale contracts. Minimum order from just 25 kg.

COME AND SEE IT FOR YOURSELF

Buyers are welcome to visit our operation and the curing facilities we work with. We arrange transport, translation and farm access, and you are welcome to inspect any lot before it ships. What you are shown is what you receive.

OUR RANGE

Complete vanilla solutions for every industry

BEANS

Vanilla Beans

Premium Grade A and Grade B *Vanilla planifolia*, hand-picked and sun-cured for six to nine months using the traditional Bourbon method. Grade A for gourmet, retail and premium culinary applications; Grade B for extraction, where higher vanillin concentration per kilogram matters more than cosmetic appearance.

Grade A & B

V. planifolia

Vacuum packed

HS 0905.10

MOQ 25 kg

PASTE

Vanilla Paste

Custom composition vanilla paste blended to your exact specification — seed density, viscosity, sweetener base and vanilla solids adjusted to your formulation. Supplied in food-grade jerrycans as standard, or in whatever packing format your operation requires.

Custom formulation

Jerrycan or custom

Spec sheet per batch

HS 2106.90

MOQ 25 kg

POWDER

Vanilla Powder

One hundred percent pure vanilla powder, finely milled from cured beans with no carriers, fillers or added sugar unless specified. Suited to dry-blend applications, bakery premixes, beverage powders and applications where liquid extract is unsuitable. Packed in 1 kg and 5 kg foil laminate pouches, or in food-grade pails for bulk volumes.

100% pure

No fillers

Foil pouch or pail

HS 0905.20

MOQ 25 kg

Private label and custom packaging available for all three categories. Samples and confirmed orders are dispatched within 24 hours of confirmation, with larger volumes scheduled to quantity.

PRODUCT SPECIFICATIONS

Transparent specs. What you see is what you get.

SPECIFICATION	GRADE A BEANS	GRADE B BEANS
Species	Vanilla planifolia	Vanilla planifolia
Moisture content	25 – 35%	< 25%
Vanillin content	1.3 – 2.7%	1.3 – 2.2%
Bean length	16 – 20 cm	10 – 16 cm
Curing period	6 – 9 months	6 – 9 months
Appearance	Dark brown, oily, flexible, unsplit	Drier, may be split or shorter
Typical application	Gourmet, retail, culinary	Extraction, paste, powder
Packing	Vacuum packed, food-grade	Vacuum packed, food-grade
Minimum order	25 kg	25 kg
HS code	0905.10	0905.10

SPECIFICATION	VANILLA PASTE	VANILLA POWDER
Composition	Custom to buyer specification	100% pure cured vanilla
Texture / particle size	Seed-visible paste	Finely milled from cured beans
Packing format	Food-grade jerrycan, or custom format to buyer requirement	1 kg & 5 kg foil laminate pouches, carton packed; bulk in food-grade pails
Minimum order	25 kg	25 kg
HS code	2106.90	0905.20

Figures represent typical ranges across our standard lots. Batch-specific certificates of analysis are issued per shipment and take precedence over the ranges shown above. Custom specifications can be accommodated subject to volume and lead time. HS codes shown are indicative; final classification of paste depends on formulation and destination tariff schedule.

QUALITY & TRACEABILITY

From field to container, every lot is accounted for

Vanilla is one of the most adulterated commodities in the global spice trade. Our answer is not a marketing claim — it is a documented chain of custody and independent laboratory verification on every lot we ship.

01 Sourcing and lot identification

Green pods are purchased from known farmers and farmer groups. Each intake is assigned a lot number recording origin region, harvest window and supplier.

02 Traditional curing

Blanching, sweating, sun-drying and shade conditioning over six to nine months at established curing facilities, developing full aroma and vanillin crystallisation.

03 Incoming inspection

Every lot is inspected on arrival for moisture, flexibility, aroma, mould and foreign matter. Lots outside specification are rejected, not blended in.

04 Grading and conditioning

Beans are sorted by length, appearance and moisture, then conditioned to target moisture before packing — the stage where most quality complaints in this trade originate.

05 Laboratory verification

Independent testing for vanillin content, moisture, pesticide residue and microbiological safety through accredited Indonesian laboratories. Certificates of analysis issued per batch.

06 Vacuum packing and dispatch

Food-grade vacuum packing with lot codes retained on every unit, so any bean in any carton can be traced back to its source intake.

AVAILABLE ON REQUEST, PER SHIPMENT

- Certificate of Analysis (batch-specific)
- Pesticide residue report
- Lot traceability record
- Vanillin & moisture analysis
- Microbiological report
- Photographic & video stock verification

SERVING BUYERS WORLDWIDE

Export markets and shipping terms

We ship Indonesian vanilla with full export documentation to buyers across the Gulf, Europe and North America, alongside established trade into the Asia-Pacific region.

UAE & Middle East

Dubai, Abu Dhabi and across the GCC. Halal-compliant sourcing. Fast air freight with 3–7 day delivery to major hubs.

Europe

Netherlands, France, Germany and wider EU. Documentation prepared to meet EU food safety and traceability expectations, including residue testing on request.

United States

East and West coast delivery via DHL and FedEx. Documentation prepared to support importer FSVP requirements and FDA prior notice filing.

Australia & Asia-Pacific

Sydney, Melbourne and Perth, with 5–7 day delivery. Established trade routes across Southeast and East Asia.

Incoterms offered

FOB Jakarta, Semarang or Surabaya, plus CIF and DDP. Sea freight for container volumes; air freight for samples and time-sensitive orders.

Dispatch

Samples and confirmed orders are dispatched within 24 hours of confirmation. Larger volumes are scheduled according to quantity and packing format, with a firm dispatch date confirmed in writing at the time of order.

EXPORT DOCUMENTATION PROVIDED

- Phytosanitary Certificate
- Certificate of Origin (Form E / Form D as applicable)
- Commercial Invoice & Packing List
- Bill of Lading / Air Waybill
- Batch Certificate of Analysis
- Additional market-specific documents on request

PAYMENT TERMS

- T/T — 50% deposit on order confirmation, balance against copy of Bill of Lading
- Irrevocable L/C at sight for container-scale orders
- Sample and trial orders — 100% in advance
- Quotations valid 14 days from date of issue

GET STARTED

Request a sample. No risk, no commitment.

Tell us the grade, volume and destination and we will return a formal quotation within 24 hours. Samples are dispatched worldwide so your team can assess aroma, moisture and vanillin against your own standards before committing to an order.
